

*Begin by standing on the outside (secure side), facing the door.  
The secure side is typically the side where you would insert the key.*

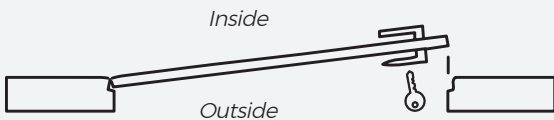

**RIGHT HAND (RH)**

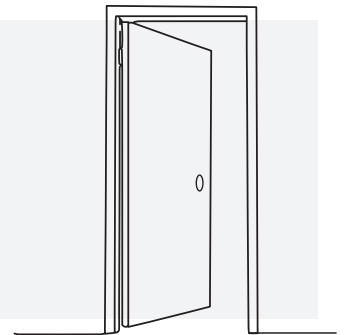

The door is **hinged on the right** and the door **pushes away** from you.

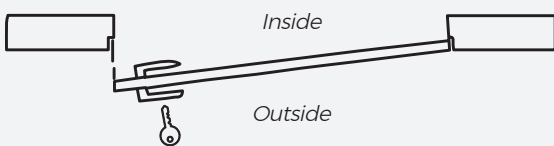

**LEFT HAND (LH)**

The door is **hinged on the left** and the door **pushes away** from you.

**RIGHT HAND REVERSE (RHR)**

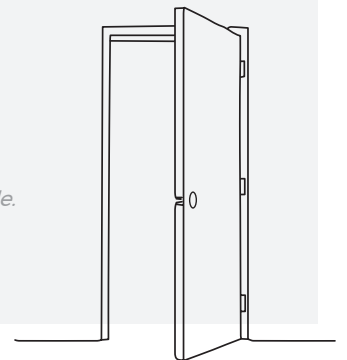

*The exit device is always mounted on the inside of the door.*

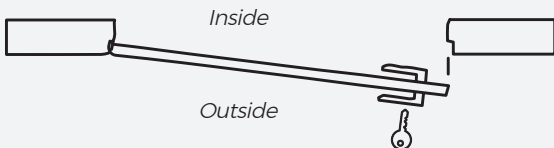

The door is **hinged on the right** and the door **pulls towards** you.

*At Weiland, the INFIT Cooler/Freezer doors are always RHR or LHR - as they swing OUT away from the colder side and toward the secure side.*

*PANIC Bars or BUMP Bars will always be a REVERSE as they swing OUT of the building.*

**LEFT HAND REVERSE (LHR)**

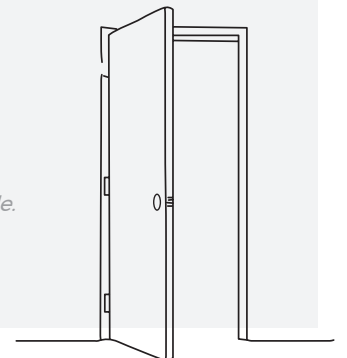

*The exit device is always mounted on the inside of the door.*

The door is **hinged on the left** and the door **pulls towards** you.

*At Weiland, the INFIT Cooler/Freezer doors are always RHR or LHR - as they swing OUT away from the colder side and toward the secure side.*

*PANIC Bars or BUMP Bars will always be a REVERSE as they swing OUT of the building.*

**THERE IS NO EQUAL**
